

In this subject students will be introduced to understanding 'Narrative' and analysing film texts. They will also explore representations in various media products and the codes and conventions of different film genres. This will lead to students working individually and collaboratively to create short films, posters and magazines. Students will have access to the Macintosh Lab and all the programs in the Adobe CC suite. The aim of the course is to give students experience in using industry quality programs and prepare for VCE Unit 1 and 2 Media.
