

St John Ambulance Cadet Program is a national self-funding charitable organization, active in every state and territory, dedicated to helping people in sickness, distress, suffering or danger. St John has been active in Australia for over one hundred years, and are part of a wider international organization with a long and honorable history.

Operations Branch volunteers in their familiar black and white uniforms provide the highest quality first aid coverage at sporting and community events. Students strive to complete their Preliminary First Aid certificate, which gains them entry to St John Ambulance and prepares cadets for duty with adult members of the Operations Branch.

NOTE: Students must have completed the St John Ambulance Cadet Program in Year 9 and please be aware that this course does not continue beyond Year 10.
